(a) Physics	a. It is used for demonstrating thermal expansion, comprising a captive brass ball secured to a mounted brass ring by a chain. Ring mounted on rod with a wooden handle. The ball passes through the ring when cold but will not pass through after being h. b. Rheostat Rheostats are used as series resistors or potentiometers. Open slide wire type with a variety of resistance and current carrying capacity. Copper nickel alloys wire is oxidized to provide perfect insulation. It comes in various types of sizes, 6",8.. Resistance Box c. Housed in box with brass knobs fitted. Provided with 4mm socket terminals. Accuracy +- 1% Range: 0.1 to 1, 1 to 10, 10 to 100, 100 to 1000, 1000 to 10000 OHMS. Also available till infinite range. d. Vernier Calliper Vernier Calliper, 12.5cm length. Available as Wheel Type & IME Type. Mostly chrome plated. Also available in S.S. Aneroid Barometer-Demo. e. It is With 100mm dial graduated 28 to 31 inch of mercury and 960 to 1060 millibars. With plated blazel, cover glass and index plastic base approx 16cm dia. A very superior quality product for schools. Aneroid Barometer-Wall Type f. This Barometer is Hanging on Wall Type with front glass Diameter 10cm representing the rain, stormy weather, Dry & other conditions.	a. (f) Music	Schools should use small pupil-led enquiry teams to build relationships with teachers and enable students to share their learning experiences. 3. Teachers should encourage active engagement with learning by introducing more 'hands on' exploration or making processes into lessons. This will help students' engagement with the subject and turn abstract ideas into more memorable experiences and knowledge. 4. Connected to the point above, teachers, school leaders and policy-makers should consider how to use a range of techniques to create opportunities for students to be active, rather than passive, participants in the learning process and think about the implications in relation to assessment methodologies. 5. Teachers should use active collaborative learning processes, which support opportunities for challenge and debate, to engage and build students' confidence in the subject. 6. School leaders need to create a culture of innovation in schools that is less risk adverse and more open to innovation. Teachers need more strategic support, training and permission to integrate these new approaches into the core work and culture of the school. Policy-makers should ensure the benefits of adopting such an approach are fully understood and recognised within school assessment processes. 7. All stakeholders should consider how lessons from this study, consolidated with further evidence from previous academic research, can be actively promoted	Schools should use small pupil-led enquiry teams to build relationships with teachers and enable students to share their learning experiences. 3.
